NOTICE

To: All Interested Parties

Subject: 2009 Refund Value per Segregated Pound, Refund Value per Commingled Pound and Containers per Segregated Pound Rates

This notice is to inform you of changes in the refund value per segregated pound rates as well as statewide and individual refund value per commingled pound rates for each type of recycling program. Refund value per commingled pound rates are set each year to reflect the percentage of California Redemption Value (CRV) containers in loads of recyclables containing both CRV and non-CRV containers and are the basis for proper payment of CRV for such loads.

New rates for aluminum, glass, plastic, and bimetal beverage containers will be effective January 1, 2009, pursuant to the annual calculation requirement in Public Resources Code Section 14549.5.

Attachment 1 reflects the refund value per pound rates by program type. Table 1 applies only to recycling centers where individual transactions take place. The statewide average containers per segregated pound rate for each material type is also provided here for informational purposes only. Table 2 applies only to material redeemed through reverse vending machines. Tables 3, 4, and 5 are for curbside programs, certified dropoff or collection programs, and community service programs, respectively.

Attachment 2 is a refund value conversion chart intended only for use by recycling center operators, which reflects the refund values to be paid for consumer transactions. This chart is designed to determine the refund value based on weight received, rounded to the nearest one-tenth pound. This chart is not to be used for curbside, dropoff or collection, and community service program transactions.

Curbside, dropoff or collection, and community service programs may exercise their option of conducting an individual commingled rate study to determine rates solely for their program(s).

Attachment 3 specifies the 2009 Individual Commingled Refund Values per Pound and should be used to determine proper payment to applicable curbside, dropoff or collection, and community service programs. Individual commingled rates

are applicable to specific material types (i.e., aluminum, glass, PET plastic, and HDPE plastic).

A program may use an individual commingled rate for one or more material types and a statewide commingled rate for another. All curbside, dropoff or collection, and community service programs not listed on Attachment 3 will continue to receive CRV at the statewide average refund value per commingled pound rates for all material types, until further notice.

The Department will continue to monitor the beverage container recycling stream with respect to the containers per pound, refund value per segregated pound, and refund value per commingled pound rates. Any significant changes will be analyzed and necessary adjustments will be addressed in future notices.

NOTE TO CERTIFIED RECYCLING CENTERS: If the changes to the refund value per segregated pound and refund value per commingled pound rates overlap a receipt and log period, it is recommended that a Shipping Report (DR-6) be filled out for the period of the old rate and a separate DR-6 be filled out for the period of the new rate. Failure to separate the weights may delay your payment and the Department will only reimburse payment at the lower rate for the entire reporting period.

If you have any further questions regarding these refund value per segregated pound, refund value per commingled pound rates or the number of containers per segregated pound, please contact Chris Goetzke at (916) 327-7596 or Darald Walther at (916) 322-4178. For questions regarding the individual commingled refund value per pound rates, please contact Paul Turner at (916) 324-5026. Written comments may be sent via mail to 801 K Street, MS 17-24, Sacramento, CA 95814 or via facsimile to (916) 445-0645.

**PAYMENT OF CALIFORNIA REFUND VALUE
EFFECTIVE JANUARY 1, 2009**

California Code of Regulations, Title 14, Section 2500(e), requires recycling centers to post the following refund prices by weight or by container and by material type.

Table 1. ALL RECYCLING CENTERS

Table 5. COMMUNITY SERVICE PROGRAMS ONLY	
Material Type	Refund Value Per Commingled Pound
Aluminum	\$ 1.55
Glass	\$ 0.059
PET Plastic	\$ 0.80
HDPE Plastic	\$ 0.12

*(B) and (C) only are to be used to calculate the Refund Payment.

** For machines intake volumes only.

Note: The containers that produce the Containers Per Segregated Pound (CPP) in column (A) vary in size. Consequently, the refund value is \$0.05 for some containers (<24 oz.) and \$0.10 for others (≥24 oz.). Therefore, one cannot simply multiply the CPP average by either refund value to get the Refund Value Per Segregated Pound rates, column (B).

How to use this chart:

- 1: Determine weight of customer's load.
- 2: Find the number of "WHOLE POUNDS" on the chart.
- 3: Look across the chart under the material type being weighed. Note the amount paid in CRV for that many whole pounds.
- 4: Find the amount of the customer's load that is a fraction of a pound ("TENTHS OF A POUND") and note the amount paid for CRV for that part of the load.
- 5: Add the two amounts.

Note: For loads containing one (1) CRV container, determine payment based on count.
For loads containing two (2) CRV containers or more, payment can be determined using this chart.

How to use this chart:

- 1: Determine weight of customer's load.
- 2: Find the number of "WHOLE POUNDS" on the chart.
- 3: Look across the chart under the material type being weighed. Note the amount paid in CRV for that many whole pounds.
- 4: Find the amount of the customer's load that is a fraction of a pound ("TENTHS OF A POUND") and note the amount paid for CRV for that part of the load.
- 5: Add the two amounts.

Note:

For loads containing two (2) CRV containers or more, payment can be determined using this chart.
